**Installation & use**

Ragged posts require an excavated hole of approximately 300mm<sup>3</sup> for installation. Flanged posts up to 127mm in diameter require bolting down to a suitable concrete surface (no less than 300mm<sup>3</sup>) using four M12 bolts. Flanged posts with a diameter of more than 127mm require bolting down to a suitable concrete surface (no less than 300mm<sup>3</sup>) using four M16 bolts. AUTOPA recommends that posts are placed no further than 1,200mm apart to ensure that no vehicle may pass between them. This product is guaranteed for 12 months (if installed and used correctly).
