

The AUTOPA Corner Protection Hoop

The AUTOPA Corner Protection Hoop provides protection for corners and other vulnerable areas on busy industrial sites. Manufactured from mild steel and galvanised for longevity, the Corner Protection Hoop is highly durable. Available in 1000mm and 500mm heights they can be used to protect a wide range of locations from vehicles of different sizes.

Corner Protection Hoops are available in galvanised, galvanised and coated, and stainless steel finishes (RAL/BS numbers must be specified at time of order). Optional reflective tape can be added to maximise visibility.

Supplied ragged as standard, flanged versions are also available.
