

Coping

Generated on 02.10.2017

Detailed description

An ideal choice for new and existing walls. Replacing natural stone wall copings with cast stone for a restoration project is a more cost effective and quicker option over natural stone. Procter Cast Stone can expertly replicate and accurately colour match as the texture and finish of cast stone is so authentic, so that the end result will look almost indistinguishable from natural stone. Typically our copings are used in residential, commercial, parks & recreation along with civils work such as flood defence. As with all our projects we are happy to accommodate bespoke designs.

Options

Type:

A wide range of coping stone styles are available to suit wall thickness - consult manufacturer's literature and insert size/ design requirements.

Product specification
