

Window Heads

Generated on 02.10.2017

Detailed description

A window head is the single stone which spans the aperture above a window and a door head spanning the aperture above the door. These are non-structural decorative features that enhance the visual appearance of a project. Procter Cast Stone standard cast stone window heads and door heads are generally suitable for new build projects and self-build, though for building renovations bespoke window heads and door heads may be required. There are an extensive range of standard window heads and door heads and these can be supplied in a wide choice of colours.

Options

Type:

A wide range of non-standard head styles are available - consult manufacturer's literature and insert size/ design requirements.
