

SIMPLY CLEAR

The GEZE Pendulo System with integrated door closer

Spaces without visible limitations: This is possible with the GEZE Pendulo all-glass wall system. As a transparent partition in offices, in shops or at home. The Pendulo System provides many different elegant solutions. The special feature is that the GEZE system conceals intelligent technology - an integrated door closer - in the lower design profile. This means that the door can be opened in both directions, it offers a balanced closing movement and it swings gently back to its rest position.

The planning of the GEZE all-glass wall system is also uncomplicated. Using the online-based Pendulo Configuration, complete solutions can be designed quickly and easily from a single source, tailored to individual wishes. In addition, the system is installed quickly, without any time-consuming interventions in the floor, the walls or the ceiling.

ONE SOLUTION - MANY APPLICATIONS

- 
- complete single-source system solution
 - simple and fast planning using the Configuration tool
 - easy and uncomplicated installation
 - room partitioning with maximum transparency
 - elegant solution for offices, shops or at home
 - flexible, expandable system

CLEAR BENEFITS:

WITH THE GEZE

PENDULO SYSTEM

The installation of the Pendulo all-glass wall system is simple and easy, because...

- ... the integration of the door closer in the profile makes installation easy.
- ... there is no need for interventions to be made in the floor, the walls or the ceiling.
- ... no glass machining is needed for the door rails and fixed panel profiles.
- ... the fixed panel profile has clamping plates that can be fitted in any position.
- ... compensation can be made for building tolerances with the variable glass inset in the fixed panel profile.

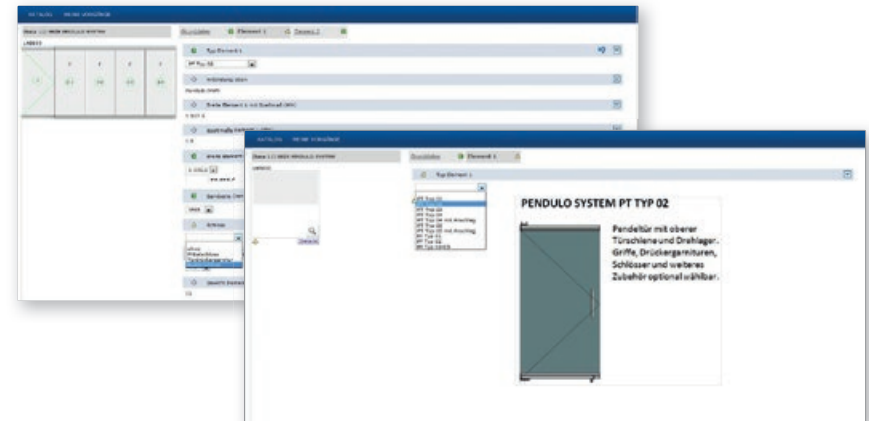

Fixed panel profile

Door profile

CLEAR INSTALLATION:
SIMPLE AND QUICK

SIMPLE PLANNING:
CLEAR AND
UNCOMPLICATED

The Pendulo Configuration tool simplifies the planning, because...

- ... the order can be placed conveniently and easily through a PC or Tablet.
- ... operation is intuitive.
- ... all the necessary overview, installation and glass drawings are created automatically.
- ... data access and data archiving is possible from anywhere.
- ... it covers the whole process, from creating the offer to processing the order.
- ... a preview window visualises the configured system in realtime.

CLEAR DESIGN: INTELLIGENT TECHNOLOGY CLEVERLY INTEGRATED

The look of the Pendulo all-glass wall system is convincing with its visual appearance, because...

- ... it creates separate spaces with maximum transparency.
- ... the door closer is attractively integrated into the lower door profile.
- ... no time-consuming interventions are needed in the floor, the walls or the ceiling.
- ... the door rail protects the lower edge of the glass against damage.
- ... it offers a wide range of different applications and can be made up of any combination of fixed panels, fanlights and double-action doors.
