

## Pro-sure Fencing

PCD17

The mesh is a 75 x 12.5 x 4mm fabric (commonly termed 358 mesh) and these very small apertures mean it's not possible to get a finger or toe hold for climbing, or get access with a cutting tool. A range of heights is available of up to 6 meters, posts are hollow steel sections with the mesh overlapped and secured with full length clamp bars and security fixings. Finish in a wide range of standard RAL colours. Non-standard colours are also available.

**Pro-sure** is for high security applications, though is often used for lower security applications for peace of mind.

*Matching Swing Gates or Sliding Gates can be supplied.*

## Applications

Perimeter
Utilities
Warehousing
Airports
Retail
Industrial Units

## Product Data

<b>Finish</b>	Hot dip Galvanised to BS EN ISO 1461:2009 and polyester coated to a range of RAL colours
