Internal Door Systems

**Compback Living 180°**
COMPACK® living is a revolutionary system that reduces door clearance needs and maximizes usable space. Areas around doorways can be redesigned to utilise more of the room. No more problems of conflict between adjacent doors. The door folds in half against the wall, reducing space needs by 50%. When closed, the door becomes a single element similar to a normal one-piece door. The door closes against a rebate on the two sides and across the top.

**Ergon Living**
ERGON® living brings a revolutionary system to the home, which reduces the volume and increases the available space. During the design phase, the access areas can be re-organised to increase the available space in the rooms. The door can be opened from both sides, you can enter or leave the room by just pushing the door which then quickly closes behind you. The double action opening is the ideal solution to emergency doors and these features are also practical for the disabled. The simultaneous rotating and translating movement of the door during opening and dosing means that the volume is reduced to a minimum, making access easy even in very small rooms.

The push system is as practical as any other normal door leaf.
External Door Systems

Vistafold

Ideal for internal and external folding doors when a structure is not available to support doors from above. With minimal floor track and guide channel it can easily be installed into existing apertures with little disruption. The track can either be let into a frame or face fitted with an 8mm timber ramp either side.

The hardware includes suited hinges, handles, running gear and all items are available in a choice of silver or gold 25 micron anodised finish (track only available in silver). Now also updated to include height adjustment on the bottom roller (50mm variant only).

Barrierfold

A top hung folding system for patio doors. All components are made from stainless steel with a brushed stainless finish, 25 micron anodised aluminium track and channel (pvc insert in channel) and tough durable nylon wheels for a smooth quiet operation. The system also has complete adjustment at every hanger and pivot point. Easy to specify and is available in both satin stainless and polished gold PVD finishes.
Vistafold 120S

High quality, high capacity inline bottom rolling folding door hardware. Designed to meet PAS 24 requirements (Pending Test), 120S builds on the original Vistafold 56 by adding height adjustment to the bottom roller. Vistafold 120S is manufactured from 316/304 and comes in a satin stainless finish. Shims are also available for the hinges giving up to 2mm of adjustment per hinge point for added adjustability where required.

- **120** Leaf weight kg
- **1000** Max leaf width mm
- **3300** Max height mm
- **44** Minimum door thickness mm

Top guide
Bottom roller
Sleek frame design
End elevation with recessed track option
Three door layout
Surface mount track option
Frameless Glass Systems

**Barrierstack SFW-DR**

The BarrierStack BS-FW-DR is a highly versatile sliding folding hinged system ideal for all kinds of commercial and residential projects. Ideal for applications such as house to conservatory, restaurant to terrace, meeting room to meeting room etc. Glass requires no drilling or notching (apart from handles of choice). The door rails are Satin Stainless effect 20 micron anodised aluminium which can easily be used in coastal and marine applications. Can either be endfold or centrefold layouts to suit application.

**Barrierstack SWS-DR**

The BarrierStack SWS-DR is a sliding stacking system ideal for all kinds of commercial and residential projects. Ideal for applications such as house to conservatory, restaurant to terrace, meeting room to meeting room etc. The glass requires no drilling or notching (apart from handles of choice), multiple stack layouts are available and you can have a controlled pass door anywhere along the wall. Door rails are Satin Stainless effect 25 micron anodised aluminium - suitable for coastal use.

**Barrierstack SFW-PF**

The BarrierStack SFW-PF is the perfect solution when you want a completely frameless glass folding partition. With it’s highly engineered hinges incorporating drop bolts where required, the SFW-PF is at home in all applications, both commercial and internal residential settings. The finish is bright silver coated aluminium with 304 stainless steel anti tamper dropbolts. Odd leaf layouts have the last leaf acting as a daily use swing door.

**Faltus**

High quality centrefold system for internal frameless glass partitions. Faltus requires no floor channels and comes with magnetic hinges to keep panels flat when closed.
