**Welding hinges**

These two part lift off hinges are available in nine sizes from 45mm to 200mm and can be used on doors of either hand. The tear-drop lozoball profiles are machined from hot rolled easy weld steel sections and are fitted with a fixed steel pin.

All sizes are complete with a brass washer but as an alternative, a limited range can be fitted with a ball bearing washer. Five sizes are also available in stainless steel. (Grade 304L)

### Universal Hinges

Note: Ball bearing washer increases overall height by 4mm approx. Ball bearing washers are recommended for heavy duty doors and doors which are in constant use. The bearing assembly consists of 2 hardened steel cones in a steel case.

A simple and economical system for single action, self-closing, steel doors. Both the spring unit and hinges are weld fixed to the door and frame. The spring unit has an adjustable strength spring whilst the hinges have brass pins and ball bearing washer.

Two hardware kits are available:

For doors up to 60kg/1000mm wide

Kit 551/60/257 consisting of 1 spring unit and 2 hinges.

For doors up to 100kg/1200mm wide

Kit 551/100/257 consisting of 2 spring units and 2 hinges.

The hardware can be fitted to doors of either hand.
**FLAG HINGE**

These two part lift-off hinges are available in eight sizes and because the flag plates are not offset they can be fitted to doors of either hand. The mild steel flag plates are electrically welded to the round, steel knuckle which is fitted with a steel pin. All sizes are complete with a brass washer but as an alternative a limited range can be fitted with a ball bearing washer. All sizes include an oiling hole and cap.

**FLAG HINGE 1150RR**

A heavy duty lift-off hinge with offset flags. The hinge parts are machined from a hot rolled mild steel profile and supplied unplated for either welding or bolt fixing. The adjustable 14mm ø zinc plated steel pin is fitted with a ball bearing washer. As these hinges are handed - please specify when ordering.
Industrial hinges

A range of hinges designed for sheet metal and other types of steel door fabrication. Normally fixing is by welding but bolt fixing is an alternative for certain hinges. All hinges are manufactured from mild steel and are not galvanized. Hinge parts are undrilled.
