

Turn and Learn™ Educational Seating System

Collaborative learning has been shown to boost knowledge retention and it is becoming core to the education process. It is the mission of Ferco to provide the infrastructure to enable that to happen.

Environment has an enormous practical and qualitative impact on learning. Learners need to be able to easily engage with their peers, as well as to receive a one-to-one experience with their educator.

The Turn and Learn™ Educational Seating System creates the environment where collaborative learning can flourish. Collaborative learning is a student-centred approach, focusing on group work and interaction, teaching

sessions are structured so that knowledge disseminated by the lecturer is discussed.

Following this concept, students are encouraged to listen to, engage with and learn from each other, taking turns to lead and supporting their peers. It also fosters cooperation and sharing, encompassing diversity and understanding.

The Turn and Learn™ Seating range, with its unique design, supports the requirements of physically interactive teaching spaces. Simple desks are arranged between comfortable seats which rotate a full 360°, giving full line of sight of the lecturer, allowing both didactic and group work.

Phygital experiences - interactions between physical and digital space - are supported by Turn and Learn™ seating, by the easy integration of power and data sources.

The range is suitable for a number of different applications, including education settings, libraries and canteens, IT suites and offices. It offers good capacity and can be fitted into different shaped rooms, in flexible layouts, with easy installation. This flexibility also makes it popular in executive settings and commercial spaces.

ARC One Turn and Learn™

The ARC One Turn & Learn™ lecture theatre seat is a highly sought after choice from the Turn and Learn™ range – ergonomically shaped, offering superior lumbar support whilst promoting correct posture. The chair is virtually maintenance free and extremely versatile, designed to support various usages whilst providing maximum comfort. Something which is of paramount importance in lecture theatres and auditoriums, where individuals frequently remain seated for longer periods of time.

All Ferco swivel seats have been designed so they provide ergonomic and postural support, incorporating a contoured back that focuses on supporting the lumbar region and promotes correct sitting posture, helping students to stay focused on their studies.

Each individual seat integrates a gas lift for height adjustment and smooth silent rotation between positions. When it's not being used, the seat automatically returns to the original position, keeping the space looking tidy and the throughway unobstructed for easy access and exit.

Located close to the Thames and within easy reach of the beating heart of the British capital.

The main campus is within walking distance of vibrant Kingston town centre and provides a wraparound experience for student incorporating a library, health centre and canteen.

Expansion continues at the faculty, with a new development at the Learning Resources Centre significantly enhancing the university's pedagogical offer. Projects such as the creation of a superb modern building in memory of renowned local author John Galsworthy were part of the impressive scheme of improvements taking place over the past few months.

With an eye on quality, performance and value, Kingston University selected Ferco's collaborative learning systems as the perfect fit for their Clattern Lecture Theatre.

For Kingston University, a Ferco seating solution was in keeping with their image as a progressive learning site that's continuing to make massive strides in enhancing the all-round student experience.

seating made better
