

Weldmesh Gates

PCD10

Welded mesh swing gates are designed and fabricated from hollow section steel frames, clad with welded mesh or chain link and secured with tamperproof fixings. Our mesh entrance gates are made to be robust and secure to withstand regular frequent usage over a long time.

Very large gate span swing gates need a very large space to open into, so sliding gates may be more suitable.

Can be made up to 5m high and for openings up to 16m sliding gates for wider openings). Finish can be galvanised or powder-coated in any colour, plus company logos added.

Applications

Schools
High Perimeter Security
Utilities
Airports
Retail Sports & Recreation
Industrial Units Warehousing
