

New from Pendock is a uPVC Pipe Boxing Range that offers a high quality white plastic finish for areas where a more durable boxing product is required. Manufactured in extruded white uPVC, this quality grade material is rated to a UL94 V-0 flame spread rating making it suitable in almost any application. The finish is resistant to both mild acids and alkalis and is easy to keep clean.

The range includes 'L' shape (**MXP**) 'U' shape (**Channel**) and skirting (**TKP**) profiles. All come with either fixing brackets or fixing strips which are also manufactured from uPVC, these are hidden from view once the profile has been fitted.

MXP Range

MXP profiles are offered in a range of width and depth sizes (all 3m long) and are ideal in situations where larger pipework or multi-pipe applications need to be covered or protected. The largest size (200mm x 200mm) is specifically designed to cover unsightly soil and vent pipes. A range of accessories is available to allow profiles to be joined together or to cover cuts at inside and outside corner situations. A universal stop end is also available.
