COMMERCIAL & INDUSTRIAL DRAINAGE

We recognise that when you're looking for a drainage system for an industrial or commercial facility, the drainage you choose needs to complement the building's design and look as good as it performs.

Manufactured from fully pickle passivated stainless steel, our drainage systems combine aesthetic appeal with high performance, corrosion resistance and durability. The range is complemented with a comprehensive range of pipe products and accessories. We also employ an in-house design team who use their expertise to provide technical support at every stage of your project.

APPLICATIONS

Our drainage is used across a wide range of commercial and industrial applications including:

- ▶ manufacturing and industrial sites
- ▶ logistics facilities
- ▶ offices
- ▶ supermarkets
- ▶ shopping malls

ENGINEERED SOLUTIONS

ACO Building Drainage specialises in the design and manufacturer of high performance, engineered drainage solutions which are tailored to meet individual project requirements. Our in-house technical design team is also available at every stage of a project to provide support and guidance with regard to the design and installation of your drainage system.

WHAT ELSE DO WE DO?

In addition to providing high performance drainage products, we also offer a comprehensive range of services to support you throughout the life of your project and, via our in-house technical design team, can develop engineered solutions which are tailored to meet specific requirements.
