

## DRAINAGE FOR HEALTHCARE

Hospitals are the most complex of building types comprising of a wide range of services and functional units all of which interrelate. The diversity of function from diagnostic and treatment functions through to hospitality services requires specialised knowledge and expertise to ensure the best outcomes are achieved for both patients and staff. Within this complex environment waste fluid drainage systems play an important role in ensuring the removal of fluid whilst maintaining the hygienic requirements of the facility.

Our drainage and grease separation systems are designed around the three most important issues for the healthcare industry: the facilitation of cleanliness and cleaning, the need to encourage desired behaviour and a requirement for easy cleaning. Our products drain waste liquids hygienically and economically, and meet the requirements of the NHS Health Technical Memoranda (Policies and Principles of Healthcare Engineering).

## APPLICATIONS

Our products are used in a wide variety of healthcare environments including:

- ▶ community treatment rooms
- ▶ hospital kitchens
- ▶ pharmacies
- ▶ shower rooms
- ▶ intensive care units
- ▶ dialysis and transplant units
- ▶ operating suites

## PRODUCT RANGES

- Kitchen / Tray channels
- Modular 125 channel
- Deckline channel
- Stainless Steel Gullies
- Shower channel
- Total Flow Gullies
- Roof Outlets
- ACO Pipe
- GMX Pipe
- Grease Management Systems
- Access Covers

## CONSTRUCTION SECTORS

Food & Drink  
Manufacturing

Commercial  
Kitchens

Hotels

Infrastructure

Commercial &  
Industrial

Healthcare

Education

Sport & Leisure

Residential

## DESIGN SERVICES

ACO Building Drainage has its own in-house design team to provide support at every stage of your project. Staffed by highly experienced engineers who live and breathe drainage systems, the team can undertake design work ranging from channel layouts through to hydraulic calculations and part scheduling.

Whether you're involved in designing or building a new project or upgrading an existing building, our team can help you plan every aspect of the drainage system to ensure it meets your requirements simply, quickly and within budget. Services are free of charge and without obligation.

## WHAT ELSE DO WE DO?

In addition to providing hygienically designed, high performance products, we also offer a comprehensive range of services to support you throughout the life of your project and, via our in-house technical design team, can develop engineered solutions which are tailored to meet specific requirements.
