### DRAINAGE FOR SPORTS & LEISURE APPLICATIONS

Whether you require drainage for pool and shower areas, high capacity drainage for sports grounds or rainwater outlets for leisure centre buildings, ACO Building Drainage can design and manufacture high performance drainage systems to suit your needs.

Our products offer market-leading performance with regard to corrosion resistance, durability and, when appropriate, hygiene. Our in-house design team also provides expert technical support at every stage of your project.

### APPLICATIONS

We provide drainage for a wide range of applications within the sports and leisure sector including:

- ▶ swimming pools
- ▶ sports grounds
- ▶ major sports stadia
- ▶ leisure centres
- ▶ visitor centres
- ▶ parks

### PRODUCT RANGES

- Modular 125 channel
- Stainless Steel Gullies
- Total Flow Gullies
- Roof Outlets
- ACO Pipe
- GMX Pipe
- Freedeck channel
- Deckline channel
- Access Covers
- Grease Management Systems
- Engineered Solutions

ACO. The future of drainage

## CONSTRUCTION SECTORS

Residential

## VALUE ENGINEERING

Our technical design team is staffed by experienced engineers who live and breathe drainage. As a result, they can provide a level of support and service that is the envy of our competitors.

Their expertise ensures your drainage system design is optimised to give you the solution you require without incurring excessive cost and, for complex external drainage projects, key services include the provision of hydraulic calculations.

So whether you're involved in designing or building a new project or upgrading an existing building, our team can help you plan every aspect of the drainage system to ensure it meets your requirements simply, quickly and within budget. Technical support services are provided free of charge and without obligation.

## PRODUCT OVERVIEW

Email us to request a copy of our product overview.

## WHAT ELSE DO WE DO?

In addition to providing high performance drainage products, we also offer a comprehensive range of services to support you throughout the life of your project and, via our in-house technical design team, can develop engineered solutions which are tailored to meet specific requirements.
