The thermostatic valves are not bi-directional and must be installed on the flow connection position. Suitability based on standard connections featured in the brochure.

Dual Energy and Electric Elements

Zehnder's range of electric radiators, with their factory-fitted electric elements, give economical and efficient heating wherever required.

Dual energy towel drying radiators continue to offer warmth and comfort throughout the home during summer months when the central heating system is not in use.

✓ Self fit ✓ Factory fitted dual energy immersion heater * DBM not suitable for use with the Yucca Valve

To switch heating operations:

For summer use:

- Switch off the central heating Vent the radiator to ensure there isn't any
- air present • Close the flow valve (only)
- Activate the immersion heater as required

For winter use:

• De-activate the immersion heater · Open the flow valve

The immersion heater should be fitted on the return side of the radiator

Simultaneous use of the electrical element and the central heating should be avoided as this will shorten the life of the element and invalidate the warranty.

Dimensions (mm)						
A	С					
DBM short t-piece with Chromax valve						
22	17	65				
DE-Pack short t-piece with Chromax valve						
22	17	65				

We recommend that all electrical work be undertaken in accordance with current I.E.E wiring regulations. If in doubt of zoning requirements, we recommend that a 30mA R C D is installed.

Factory fitted options

Alura Temperature Controller: 3 pre-set programmes and 5 mode settings. Open window detection system and parental lock.

Fare Tech Temperature Controller: Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments. 3 pre-set programmes and 5 mode settings. Open window detection system and parental lock.

Radio frequency controller

User-friendly remote control device allows simple operation. Increased safety due to parental control. High energy efficiency due to compliance with the European Ecodesign Directive saves energy costs. Maximum surface temperature of 65°C ensures increased safety (chrome-plated version). Flexible control options: remote control device for wall mounting or base. Comfortable operation as needed due to customisable daily and weekly programmes. Low energy consumption of only 0.5 W in stand-by mode for increased energy efficiency. Comfort on demand due to adjustable boost heating.

Factory-fitted/self-fit options

DBM (Class II IPX4 - Zone 1 bath and Zone 2 shower) Manual and programmable operations, 2 temperature settings, 2 hour programmable timer. Equipped with a thermal fuse. Chromium plated t-piece included with dual energy version.

DE Pack (Class I IPX5 - Zone 1 bath and Zone 2 shower) Electric element without controls. Chromium plated t-piece included with dual energy version.

Optional Zehnder immersion heater element and cable cover (only suitable for DE-PACK). Chrome finish: SHEC-CR. Matt Black: SHEC-MB

Backlit LCD digital display screen gives complete control. Temperature can be adjusted in 0.5°C increments.
