

Client: Park Chinois

Project: Interior Building Drainage

The Park Chinois is an ambition restaurant located on Berkeley Street, which offers an all-round dining experience. This includes a focus on music in the form of piano, string quartets and light evening jazz.

Park Chinois is owed by Alan Yao; who originally opened Wagamama. Having provided products to Alan Yao's restaurants for more than a decade, Component Developments was specified to supply stainless steel drainage

channels and gullies throughout both the ground floor and basement kitchen areas of the restaurant. On the ground floor kitchen area, a total of 20 stainless steel channel drains and gullies were fitted, each with anti-slip gratings. On the basement floor, a further 2 channel drains and 15 large gully pots were fitted. All gullies installed included removable stainless steel odour traps and waste baskets placed inside which allow for easy access.

Working closely for over a year with the kitchen design team and on-site contractors, Component Developments was able to make sure the plumbing and floor tiles tied together nicely, both practically and visually.

Stainless Steel: Drainage Channels | Gratings | Trapped Gullies | Rodding Eyes | Access Covers | Corner Guards | Crash Rails | Kerbs | Special Fabrications

Accreditations: ISO 9001:2008 Quality Assurance | ISO 14001:2004 Environmental Management | OHSAS 18001:2007 Occupational Health & Safety
