

PPG PSX[®] ONE 750

One-component, low-VOC acrylic polysiloxane coating

New *PPG PSX ONE 750* topcoat provides the advantages of siloxane coatings in an easy-to-use single-component formula with low VOC and zero isocyanates. It is recommended for both new builds and maintenance applications.

Key features and benefits:

Excellent color and gloss retention compared to polyurethane

Single-component formula for fast, easy application

High solids, <250 g/L VOC, zero isocyanates, and tin-free for user friendly application

Unlimited pot life with a resealable container

PPG PSX[®] ONE 750

One-component, low-VOC acrylic polysiloxane coating

PPG PSX ONE 750 topcoat provides excellent color and gloss retention compared to high-quality epoxy/urethane coatings, maintaining its brilliant finish long after many standard urethanes and other acrylic siloxanes have begun to chalk and fade.

PSX ONE 750 acrylic polysiloxane

PPG PSX ONE 750 topcoat delivers the durability and finish advantages of siloxane in a convenient, one-component formula that can be brushed, rolled or sprayed. Its benefits include <250 g/L VOC, tin-free, and zero isocyanates. And because PPG PSX ONE 750 topcoat has unlimited pot life, its container can be resealed and the coating reused again and again, saving cost and materials.

Typical applications

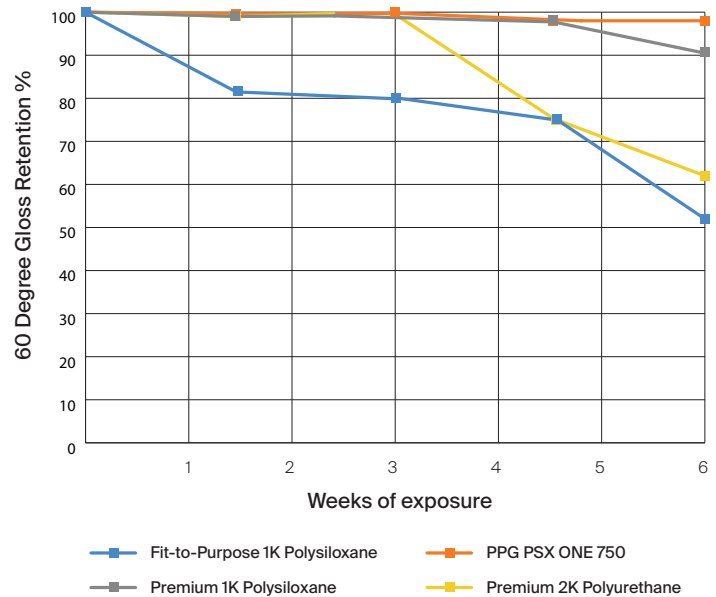

- Chemical processing
- Petrochemical
- Commercial & industrial maintenance
- Power
- Civil infrastructure
- Water and wastewater
- OEM
- Shopping malls
- Hospitals
- Marine vessels above the waterline

Other applications

- Handrails
- Window and door frames
- Metal buildings

PPG PSX ONE 750 topcoat is a great new construction option for owners and contractors. Its single-component formula makes it ideal for maintenance and repair as well as ongoing touch-up, and is available in the full PPG PSX color range. All you need is one, PPG PSX ONE 750!
