

Automatic Entrance Systems

Axis AC Type 4 & 5

AC TYPE 4 – VIDEX ONE WAY TDE SYSTEM

The kit includes a one button surface mountable door panel with an integrated keypad, a telephone and an AC power supply.

The circuitry of the outdoor stations provided with these kits, has a built-in lock relay to enable the electric lock. This reduces the cable requirement to only 4 (3 + 1) between the outdoor station and the intercom. This reduced cable requirement allows longer cable runs and reduced cable sizes to be used between the two units.

AC TYPE 5 - VIDEX TDE WITH KEYPAD

The kit includes a one button surface mountable door panel with an integrated keypad, a telephone and an AC power supply.

The keypad incorporates two dry contact relays, each can be operated from a 3 – 6 digit code. The relay time can be programmed from 1 – 99 seconds or continuous operation be using a relay time of 00 (When the code is entered the relay will stay energised until the same code is entered and the clear button is pressed).

A timed push to exit input is also included which will operate relay 1.

These systems will work in conjunction with most types of automatic door operators.
