Integral sink

Edge 7 (30mm)

Galley kitchen worktop with integral sink and upstand

**Room Type:** Residential Kitchen  
**Client:** Private Individual

GEC Anderson worked with a private client to turn their ideas into reality. From an initial email with a simple sketch and rough plan - it evolved into a stunning galley kitchen.

Featuring olive coloured wooden cabinets and terracota flooring - the client chose GEC Anderson's brushed satin finish for the stainless steel worktops.

The stainless steel worktop was made to measure. Edge 7 (30mm) was used with an integral upstand of 60mm (edge 10). It also included an integral A50 sink and niche the for range cooker with a splashback behind. The worktop, including the integral upstands were formed around the columns each side of the range cooker which created added complexity to the design.

EN 1.4301 grade brushed satin stainless was used throughout.

GEC Anderson were instructed to measure, produce, deliver and install the stainless steel worktop, integral upstands and splashback.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
