

Construction Specialties®

Making Buildings Better®

Construction Specialties (UK) Ltd

For 70 years Construction Specialties (CS) has been providing architects, designers, contractors, facility managers and end users with solutions to challenging building problems.

Founded in the US in 1948, CS has grown to become a global manufacturer of innovative, practical and sustainable architectural systems for building interiors and façades.

Our UK Head Office is the sales and manufacturing hub for servicing markets across the UK and Ireland through a network of experienced and professional technical sales representatives.

Making Buildings Better™

It is more than just our tagline. It defines who we are and what we stand for. As a leader in architectural building products, we welcome and seek out problems and unmet needs. In fact, we thrive on it. No problem is too big or too small. And we don't stop until we solve it.

Our Mission

Our mission is to understand our customers' individual design needs and provide inspired solutions for a more intelligently built environment.

Healthcare

Our Values

Creativity: We have the curiosity and confidence to look beyond what's "been done" to discover potential and create new opportunities.

Solutions Driven: Through collaboration with customers, we make it our mission to find the best answers to their problems. We draw on our extensive expertise to bring their unique vision to life.

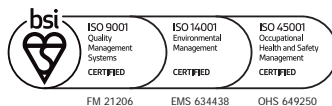

Integrity: It's not just about getting a job done. It's about getting done right. There's an easy way, and there's a right way. We work tirelessly to do it right.

Sustainability

Sustainability doesn't stop at our products. We apply the same standard of lowering environmental impact to all aspects of our business.

Acrovyn®

Wall & Corner Protection

Renowned for high quality and reliable performance, Acrovyn has been safeguarding building interiors from excessive wear, tear and impact damage for decades.

Our stylish and durable products help to extend the lifecycle of a building's fabric and significantly reduce cleaning and maintenance costs.

Recent Projects

Chase Farm Hospital | Aberdeen Royal Infirmary
Royal Hospital for Sick Children | Tune Hotels
The Defence and National Rehabilitation Centre
Imperial College London | Oban High School
Grand Central, Birmingham | Manchester Airport
Stirling Care Village | 66 Chiltern Place, London
Sub-Regional Neonatal ICC, Glan Clwyd
Napp Pharmaceuticals | Marks & Spencer, various

- Handrails & Hand/Crash Rails
- Crashrails & Rub Rails
- Corner Protection
- Bed Head Protection
- Textured & Smooth Sheet

- Wall Panels
- Wide selection of materials, styles, sizes and colour options
- ProCure22
Recommended Supplier

Acrovyn® Doors

Impact Resistant Doorsets

Designed for high traffic areas, where damage to doors and door frames is inevitable, Acrovyn Doors offer a tough and easy to clean solution.

Post-formed or fully encapsulated in our impact resistant material, they are available in a range of configurations to satisfy a project's operational, performance and aesthetic requirements.

Recent Projects

Bristol Royal Infirmary, King Edward Building
Stoke Mandeville Hospital, Aylesbury
Optegra Eye Hospital, London | Ragdale Hall Spa
Wellcome Trust Genome Campus, Hinxton
The International Quarter, Building S5, Stratford

- Fully encapsulated or post-formed in impact resistant Acrovyn Sheet
- Replaceable Door Edge Protection available
- Door frame protection options
- Wide range of configurations
- 60min fire rated (FD60, FD60S)
- 30min fire rated (FD30, FD30S)
- BM Trada Q-Mark certification available for fire doors
- Non fire-rated (NFR)

Acrovyn by Design®

Bespoke Wall Protection

Fully customisable, Acrovyn by Design instantly transforms interiors, while providing a durable, protective and easy to clean finish.

Images, graphics or branding are incorporated behind a layer of our impact and scratch resistant material, ensuring wall murals stay fresh and vibrant with minimal upkeep.

Recent Projects

Salisbury District Hospital | Limerick Hospital
BP Petrol Station, various
Royal National Orthopaedic Hospital, Stanmore
Sub-Regional Neonatal ICC, Glan Clwyd
Southend Children's Hospital
Mercure Hotel, Inverness | Poole Hospital
Royal Manchester Children's Hospital
Marriott Hotel, Heathrow

- Tough & durable surface protection
- Impact, scratch and chip resistant
- Complete design flexibility
- High quality image reproduction, ideal for displaying graphics, photos and branding
- Can be applied to interior walls, doors, counters and more
- Wipe clean surface, which is highly durable and easy to maintain
- Manufactured using our Acrovyn PVC-Free Sheet

Omniwall® Interior Partitions

An innovative, off-site manufactured wall panel system, providing fast and clean delivery of custom interiors.

Suitable for new construction or for expanding the capacity of existing facilities, the modular Omniwall system offers flexibility of configuration, adaptability and long term cost savings.

**FUTURE PROOFED

& EQUIPMENT**

*build*offsite
member

- Future proofed and adaptable
- Manufactured off-site for consistent quality, fit and finish
- Fast and easy to install
- Clean and quiet build
- Easy to maintain & reconfigure
- Easy to integrate plumbing and electrics
- Pre-configured bedhead wall layout with integrated Bedhead Services Console by Static Systems available
- Choice of panel finishes and colours

Wallglaze®

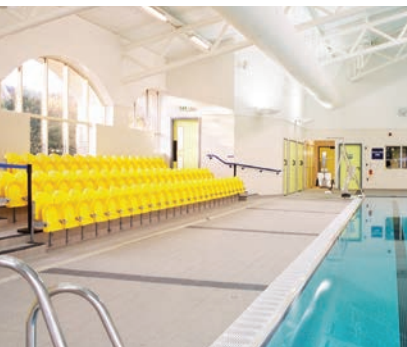

Performance Coatings

Our Performance Coatings for walls & ceilings have been formulated to deliver a high quality surface finish and long lasting performance in the most challenging environments.

A choice of systems is available to suit all building areas, from general use corridors and waiting areas, to Category 4 ACDP cleanrooms.

Recent Projects

Quadram Institute Bioscience | The Star & Garter
The Halo Building | Synergy Foods, High Wycombe
Birmingham Children's Hospital
Marine Scotland Science, Ellis Building, Aberdeen
The Donkey Sanctuary, Exeter | Francis Crick Institute
Oxford Particle Imaging Centre | Papworth Hospital
Surrey University Vet School | The Pirbright Institute
Sevenside Waste to Energy Plant

- All systems contain non-leaching anti-microbial agents to ensure a long lasting, hygienic finish
- High resin content for excellent durability and lifecycle
- Water based, solvent-free and solvent borne options
- High chemical resistance options to withstand rigorous and aggressive cleaning regimes
- Fibreglass reinforcement option for added resistance to impact, pressure and temperature fluctuations
- Solutions for interiors and exteriors

Supertrak® Plus Cubicle Curtain Track

An easy to install Cubicle Curtain Track used for providing privacy to patients and staff in multi-bed hospital wards. It can also be utilised as screening in retail/leisure changing rooms and shower areas.

The system combines a rigid structure with configuration flexibility to meet project requirements.

Recent Projects

Alder Hey Children's Hospital, Liverpool
The Defence and National Rehabilitation Centre
Queens Medical Centre, Barnstaple
The Whittington Hospital, London
The Calverton Practice, Nottingham
Antrim Area Hospital
Ravensworth GP Surgery, South Shields
St Martins Practice, Leeds

- Modular system allowing configuration flexibility
- Rigid and durable
- Glides smoothly and quietly
- Runner access points enable curtains to be changed easily
- Powder coated metal components for an easy to clean and aesthetically pleasing finish
- Offered in White RAL 9003 or Grey RAL 7040 as standard, it can be powder coated to any BS, RAL or custom colour, subject to minimum quantity

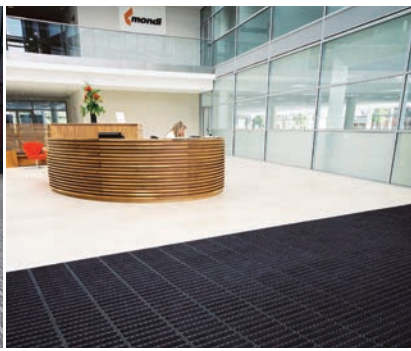

Pedisystems® Entrance Matting

Our entrance matting keeps the entrances of commercial buildings, transport hubs, schools and hospitals safe and beautiful by stopping dirt, snow and water at the door.

The range includes high performance solutions for all budgets and applications. Made to measure, CS mats are available in an array of styles, finishes, tread types and colours to complement any interior design.

Recent Projects

- The Royal London Hospital
- Intu Soar Braehead
- The Defence and National Rehabilitation Centre
- Tottenham Hotspur FC. Stadium
- B&Q, various
- Tesco, various
- Grand Arcade Shopping Centre
- Roadchef, various
- The Garment Factory, Glasgow
- University Arms Hotel, Cambridge
- MET Office, Exeter
- 40 Bank Street, London
- King's Quarter Regeneration, Gloucester

- Pedigrid - 44mm deep aluminium grid system
- Pediluxe - 17mm deep aluminium rail system
- Pedimat Ultra and Pedimat - 11mm deep aluminium rail systems
- Helix - interlocking PVC tile system
- Tetras - clean-off entrance matting
- Gridline - stainless steel grid system
- Wide range of styles, tread types, colours and finishes

Allway®

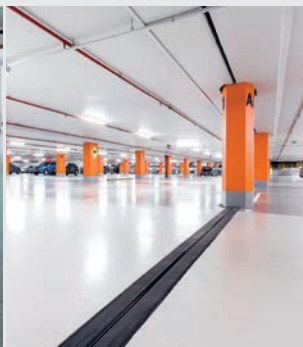

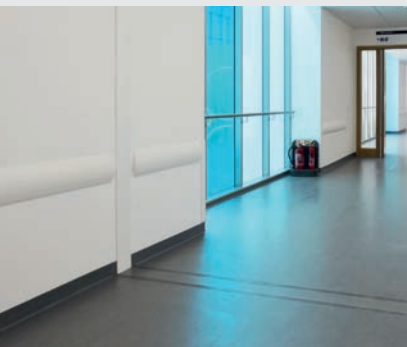

Expansion Joint Covers

A comprehensive range of Expansion Joint Covers providing safe transitions over structural expansion joints, whilst allowing the building to move.

From simple cover plates and assemblies capable of accommodating significant, multi-directional movement, to specialist covers for car parks or exterior areas, we offer solutions for all movement needs.

Recent Projects

Southbank Place, London | Credit Suisse, London
Stirling Care Village | The Mall Maidstone
Royal Liverpool University Hospital
John Lewis, Cheltenham | Bristol Life Sciences
Tottenham Hotspur FC Stadium | Bolton Interchange
Ashford International Multi-Storey Car Park
Project Beagle, Ingenuity House, Birmingham
Apple Offices, Dublin | Canary Wharf, various

- Floor, wall and ceiling joint covers
- Solutions for expansion joints in exterior walls, roofs and car parks
- Surface and recess mounted options
- Gasketed and all metal variants
- Standard and heavy duty models
- Compatible with most substrates
- Fire, moisture and acoustic barriers to suit

Louvres

Architectural Louvre Systems

Our diverse range of architectural louvre systems meets the performance and aesthetic requirements of most projects.

The selection includes: high performance solutions, effective at preventing wind-driven rain ingress; ventilation louvres allowing maximum airflow; acoustic louvres for noise control; and simple to install screening louvres.

Recent Projects

University of Northampton, Energy Centre and Learning Hub | University of Manchester Children's Hospital Tallaght & Connolly Data Centre, Slough | Epsom Hospital Lancing Preparatory School, Worthing Astra Zeneca | Premier Inn Gatwick Westgate House, Brentford | MET Office, Exeter One Bank Street, London

- Rain defence, ventilation, acoustic and screening louvre ranges
- Third party verified performance
- Continuous line or visible mullion options
- A range of accessories to suit

- A wide range of standard finishes to complement the overall façade design

Airfoil[®] Solar Shading

A simple and elegant Brise Soleil system offering a cost-effective solution to reducing solar heat gain & glare, and reducing energy requirements in buildings.

Exterior shading helps to create a comfortable interior environment for building occupants by allowing optimum levels of natural daylight and unobstructed views from windows.

Recent Projects

Ragdale Hall Spa, Melton Mowbray
St Piers School, Lingfield
Ely Leisure Village, Ely
Lida Vets, Newmarket
Crossrail Eleanor Street, London
Holloway Medical Centre, Oxford
Red Maids' Junior School, Bristol
Sansaw Business Park, Hadnall

- A range of blade sizes to suit
- Brackets and supports to allow cantilevered or façade mounted vertical or horizontal configurations
- Durable polyester powder-coated finish as standard
- LED illuminated and noise-reducing blade options also available

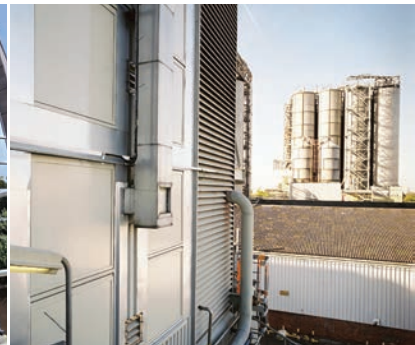

Explovent® Explosion Venting

As the industry's only field-testable pressure venting system, Explovent is designed for facilities where potentially explosive atmospheres, materials or processes exist.

Our code compliant panels are engineered and calibrated to release at very low design pressures. The wall panels are testable at any time and resettable after the event.

Recent Projects

Basell Polyolefins UK Ltd, Carrington
Southbank Place, London
The Scalpel, London
Beckton Waste to Energy Plant
Greatmoor Energy from Waste, Aylesbury
Glangwili General Hospital, Carmarthen
Jaguar Land Rover, Newbury
Amager Power Station, Denmark

- Field testable and resettable wall panels
- Calibrated to release at very low design pressures
- Wall and roof venting solutions

- Lightweight and engineered in accordance with NFPA 68 guidelines
- ATEX and Factory Mutual (FM) approved models

Conspec Contracts™

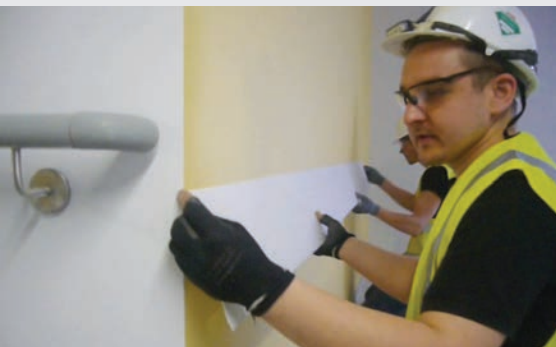

In-house Installation Service

Our well-established in-house installation division, Conspec Contracts, specialises in the installation of CS' interior and exterior solutions.

Conspec's experienced teams are committed to delivering projects on programme, without compromising on Health & Safety or the environment.

Recent Projects

Chase Farm Hospital | Aberdeen Royal Infirmary
 Credit Suisse, London | Crossrail Eleanor Street
 Tottenham Hotspur FC Stadium | Stirling Care Village
 Sub-Regional Neonatal ICC, Glan Clwyd
 University of Northampton, Energy Hub and
 Education Centre | Menai Science Park
 Altnagelvin Hospital | Digital Realty, Crawley
 Children's Hospital Tallaght & Connolly

- Dedicated CSCS accredited supervision
- CSCS accredited installation teams
- Full UK and Republic of Ireland coverage

- Comprehensive documentation
- Off-site fabrication options
- Constructionline Gold Member and Safe Contractor approved

Our Service

We are here to support you at every project stage, from product selection and specification to practical advice regarding installation and on-going maintenance to ensure product lifecycle is maximised.
